Long Night of Lymphology

Beyond Boundaries: Beginning of a new Era

Dear Ladies and Gentlemen,
Dear Colleagues,

We invite you to participate in the 7th International Lymphology Symposium – Long Night of Lymphology, from November 26th to 28th, 2026.

“In everything we do in lymphology, we challenge the status quo and embrace new perspectives.”

Progress in evidence-based medicine and science relies on robust data, as well as an open and critical mindset. Through research and in collaboration with leading international universities and clinical partners, we aim to advance therapies, drive innovation, and cultivate a truly interdisciplinary and interprofessional network together with all of you.

With our journey through “The Long Night of Lymphology,” we invite you to look beyond boundaries, explore the diversity of therapeutic options and concepts, and share the latest findings in the field.

The topics of this year’s lectures and workshops range from fundamental research to innovative developments and forward-looking perspectives in lymphological medicine. Alongside imaging techniques and both conservative and surgical treatment options for lipohyperplasia dolorosa (LiDo) [lipoedema] and lymphedema, special emphasis will be placed on the evolution and current capabilities of robotic surgery, as well as on the sensitive and demanding care of breast cancer patients and innovative approaches in this field.

In lymphology, we are committed to providing every patient with the best possible individualized and personalized treatment. This is what we work toward.

Together, let us continue our interdisciplinary journey through the fascinating field of lymphology in 2026!

“We are committed to act purposefully, lead with integrity, and work to make a positive impact on the world.”

With these words, we look forward to welcoming you to the heart of Europe for the Long Night of Lymphology 2026.

Warmest regards,
Assoc.-Prof. PD Dr. med.
Chieh-Han John Tzou, MBA
